DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to an information processing apparatus with one acquisition means working with 2 processing apparatuses, classified in class 713, subclass 200.
 - II. Claims 8-9, drawn to an information processing system with 2 acquisition means and four apparatuses, classified in class 713, subclass 201.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because I does not need to be a part of the larger system of II, and II does not have to include I. Group I has an Acquisition means acquiring from two different apparatuses. Group II does not have this limitation. The subcombination has separate utility such as a stand-alone verification apparatus.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and the search required for

Art Unit: 2134

Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Joseph Scafetta on 9/14/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
